Structured Commodity Trade involves a process where trading partners (buyers and sellers) are linked through a process that ensures the quality, quantity and safety of the commodity whose origin is in a known warehouse and the delivery logistics is managed to address the counterparty risks of delivery and payment. The structures, risk mitigation and management processes therefore allow for the trade to be financed by a third party who is assured about the source, destination and eventual payment of the commodities.

The Eastern Africa Grain Institute (EAGI), the specialized training and capacity building division of the Eastern Africa Grain Council (EAGC) is pleased to invite you to a 3-day training of Structured Commodity Trade Financing where you will learn about:

- International Commodity Trade Opportunities
- International Commodity Trade & Terms
